

Paper Ribbons

Materials:

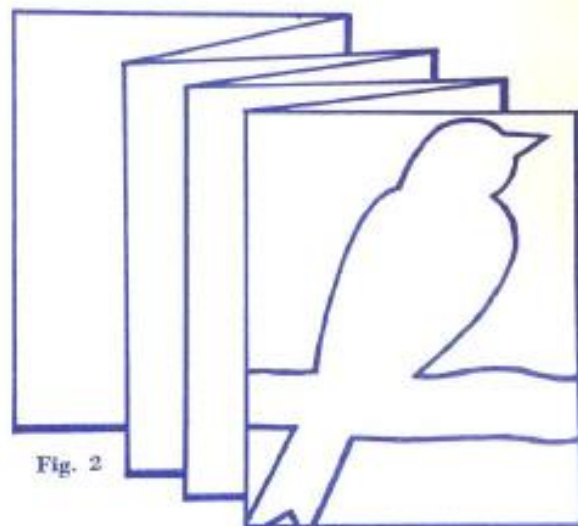

- Paper
- Stencil (below)
- Scissors
- Colours or markers to decorate

Directions:

1. Not essential but recommended: cut a piece of paper into strips, this will allow for more ribbons to come out of a single piece of paper.
2. Fold a piece of paper (strip) in a zigzag motion as to obtain equal and straight pieces.

3. Make as many folds as you can cut with your scissors and as many as your strip of paper allows.
4. Trace the picture you want in your ribbon (models below)

5. Cut the outline you drew and colour your new paper ribbon as desired.

You can use any of the models below or experiment and make your own!
