

# Make your own Tiara

Idea by Artful Parent <https://artfulparent.com/>

## Materials:

1 sheet of poster board any colour (makes 4-5 crowns)  
Drawing tools, such as crayons, coloured pencils, or paint sticks  
X-Acto knife or other utility knife  
Cardboard to protect area you will be cutting in  
Transparent contact paper (sticky-back plastic)  
Scissors  
Coloured tissue paper  
Stapler or tape

## Instructions:

1. Cut tissue paper into small pieces. If you have a heart paper punch (or any other shape!), you can punch out tissue paper as well this way.
2. Next, draw your crowns on the poster board. Here's an example:

3. Cut out your windows (shown above). Protect your table with cardboard or a cutting mat first.
4. Lay contact paper. Cover the openings with contact paper. You can press one large piece of contact paper down the centre of the poster board, covering all the cut-outs
5. Cut out the crowns from the poster board. Use scissors and follow the outlines you drew earlier.
6. Press the coloured tissue paper pieces to the sticky contact paper, you can make any design you want.

7. Decorate with markers, crayons or colouring pencils.
8. When your child is finished decorating the crown, wrap it around his/her head to determine size, then staple the ends together
