

# Sugar Scrub

## Vanilla Coffee

### Materials:

- 1 1/2 cups sugar
- 1/2 cup liquid coconut oil
- 20 drops vanilla essential oil (optional)
- 1 tbsp coffee grounds (optional) - you can even use coffee grounds that have already been brewed!

### Instructions

1. Add sugar, coconut oil and essential oil to a bowl. Stir well
2. Add coffee grounds.
3. Stir well to combine.
4. Using a canning funnel, pour into 4-ounce mason jars

### Note:

You can use any essential oils you want to give your scrub a personal touch, and there is no need for coffee grounds if you do not wish to include them.

This scrub will last up to two months if no water comes into the jar. If you decide to add fresh ingredients it will last a lot less.
